About me:

Highly motivated junior software engineer developing and delivering innovative software solutions. Skilled in multiple programming languages such as Javascript, React, Experienced in working with Agile methodologies and delivering projects on time and within budget. Adept at problem-solving, critical thinking, and communication, and able to work effectively and learn fast both independently and in a team environment. Seeking a challenging software engineering role in a dynamic and fast-paced organization.

WORK EXPERIENCE

08/12/2021 – CURRENT Tirana, Albania

SOFTWARE ENGINEER SOFT AND SOLUTION

As Junior Software Developer with experience working with Back End technologies and databases to develop public services for the government. My duties include designing, developing, and maintaining software applications that meet the needs of the government, as well as ensuring that these applications are secure and optimized for optimal performance. I am also responsible for troubleshooting any issues that arise with the applications and working collaboratively with other developers to ensure that all applications are up-to-date and functioning properly. My work is critical to the success of the government in providing efficient and cost-effective services to the public.

- Developing code for projects within the given coding standards, ensuring the highest quality of code.
- Identifying, troubleshooting, and resolving software issues.
- Building and maintaining relationships with stakeholders and other team members.
- Writing clear and concise technical documentation for public services.
- Testing software components and systems to ensure they are bug-free and perform as expected.
- Enhancing existing applications and databases using MySQL.
- Optimizing code for better performance, scalability, and reliability.
- Collaborating with other developers and system architects to design, develop, and deploy public services.
